

Sprint -3

Sprint Goals

- CREATE THE USER INTERFACE FOR THE DASHBOARD
- INTEGRATE THE LOGIN WITH DATABASE
- INTEGRATE THE TASK MODULE WITH THE BACKEND

Sprint Backlog

Sprint Task	Module	Priority	Issue encountered	Status
Sprint -3 task -1	UI development	High	Pushing the data to the backend through the modal	Done
Sprint -3 task -2	Login and Session Maintenance	High	validating the user inputs and displaying the errors	Done
Sprint -3 task -3	Integrating Backend/Frontend	High	displaying the frontend as per the role	Done
Sprint -3 task - 4	Logout module	High	Invalidating the user session in the frontend and backend	Done

What went well?

The communication between the team members has been improved greatly.

Tracking of everyone's code to make front-end and back-end integrations.

Each individual tasks performed were being done as per schedule.

What needs improvement?

The follow up on designs needs to be improved to decide the features.

The time to be spent on the database design needs to be improved

Next steps

Discuss the technical approach for dynamic data sources.

Discuss the project approaches for different personas.
