

Sprint-2

Sprint Goals

- User Interface development.
- Add validations for user authentication.
- Database modeling and integrating the API's with User Interface.

Sprint Backlog

Sprint Task	Module	Priority	Issue encountered	Status
Sprint 2: Task 1	Home Page	High	Integration of the work done by different team members	Done
Sprint 2: Task 2	Linking backend API's with the User Interface.	High	Discrepancy in underlying framework of User Interface and the API.	Done

Retrospective

What went well

Common GIT repository created so that team can work together

Team coordination has improved in setting up system configuration.

Knowledge transfer within the team so that the work gets done faster.

What needs improvement

Need to brushup and speedup the coding

Need to prioritize and divide the tasks accordingly.

Need to pickup the shorter logic instead of longer and fuzzy logic during the code programming.

Next Steps

Improve our code quality

Needs thorough testing

Improve our familiarity with the code frameworks
